**GENERAL NOTES**

1. Sign contractor shall be responsible for design and engineering of supports, anchors and miscellaneous steel or metal required for installation.
2. The sign contractor's structural engineer shall be licensed in the State of Maryland and certify all connections and support details.
3. Isolate dissimilar materials as required.
4. Field dimensions shall be taken by the sign contractor prior to preparation of shop drawings and fabrication where possible. It is the responsibility of the sign contractor to site verify all sign locations for accuracy, fit, and potential obstacles. Sign contractor shall notify appropriate person(s) of any issues, discrepancies and potential obstacles per the contract with the Owner or specified communication process.
5. All sign locations need to be located and staked by sign contractor and approved prior to installation.
6. It is the responsibility of the sign contractor to contact verify locations of underground utilities prior to digging.
7. Sign contractor must obtain all permits and field inspection approvals necessary to complete work per City and County requirements.
8. Final masonry dimensions must appear on shop drawings for review and approval.
9. Sign contractor shall follow any additional guidelines and requirements presented in the Montgomery County Bikeways Wayfinding & Sign System Standards Manual.
10. Sign contractor shall follow any additional requirements per the contract with the Owner.
